

**MANIFESTO**

Our dream is to see Ukraine in 5 years like this:

## EURO INTEGRATION

common market of financial services  
energy and transport

## CREDIT RATING

The next step – investment grade

## PRIVATIZATION

**100%**  
of state banks privatized

**MOST**  
state owned enterprises sold to investors

## GOVERNANCE EFFICIENCY

at the level of Central and Eastern Europe  
(World Governance Indicators)

## ECONOMIC GROWTH

A line-art icon of a person standing next to a screen displaying a line graph with an upward arrow.

**5%**  
annual GDP growth

A line-art icon of a person standing next to a bar chart with an upward arrow.

**5000\$**  
GDP per capita

## ENERGY

**5+** operators  
Competition  
Fast connection to electrical grids

## LAND MARKET

A line-art icon of a tractor.

↑ Share of owners  
Lending on the security of land  
Jobs in rural areas

## MACROSTABILITY

Inflation Flexible hryvnarate

**6%**

## TRANSPORT

**5+** operators  
Competition

**90%** population coverage

# OUR VISION OF UKRAINE IN 5 YEARS

- 1** In Ukraine, management efficiency is estimated by the World Governance Indicators index to the average level for the countries of the region.
- 2** GDP grows annually by at least 5% per year. GDP per capita is more than \$ 5000.
- 3** The stable macroeconomic environment. The inflation rate is stable, and it is below 6%. The hryvnia exchange rate is flexible.
- 4** The credit rating of Ukraine has increased to the highest "speculative" level - BB+, the next step is the "investment" rating.
- 5** The Ukrainian financial sector is integrated into the European one. The Ukrainians have the opportunity to use the services available to Europeans through the valid regulations of the domestic market in the field of financial services.
- 6** Most of the state-owned enterprises and all state-owned banks have been privatized. Those that remain in state ownership are managed in accordance with the best practices of corporate governance and the recommendations of the Organization for Economic Cooperation and Development.
- 7** The moratorium on sale of the agricultural land has been cancelled, and the land market is functioning. Among those who cultivate the land, the share of owners is increasing, while the share of tenant farmers is decreasing. Lending on the security of land is growing. As a result, investments are rising, and the number of jobs in rural areas is increasing.  
  
Transport and electricity markets are liberalized and demonopolized. The number of operators in each infrastructure market is more than five. Competitive principles of tariff formation in the electric power industry and transport have been introduced.
- 8** All applications of business and the population for connection to the transport infrastructure and electrical grids are satisfied on time. More than 90% of the population are provided with regular services of affordable passenger transportation.
